

## **Paragon Application Systems Signs Distribution Agreement with Dynamic S.A.**

### *Paragon Expands Product Reach in Latin America*

(Holly Springs, NC.—June 22, 2006) Paragon Application Systems, the leading global provider of ATM and EFT configuration, simulation and testing software has signed a comprehensive reseller agreement with Dynamic S.A., a leading information technology software solutions provider in Argentina. Under this agreement, Dynamic S.A. will provide distribution and technical support services for Paragon Application Systems' products in Argentina and Uruguay.

Dynamic S.A. chose to distribute Paragon Application Systems' products based on positive experience using the software. "Using Paragon Application Systems' ATMulator as a desktop virtual ATM terminal linked to Open/2 ATM terminal driving software, we were impressed with its ability to realistically simulate Diebold, NCR and Wincor ATMs," said Daniel Ares, President of Dynamic S.A.

Dedicated to offering their customers complete information technology solutions tailored to their specific needs since 1977, Dynamic recognized that their customers would benefit from the desktop simulation, configuration and testing solutions from Paragon Application Systems. "Instead of relying on actual ATMs and scheduled time windows with networks for all of their testing, financial institutions will be able to conduct ATM, POS and EFT testing directly from their desktop using Paragon tools," says Ares.

"We selected Dynamic S.A. because of their extensive ATM/EFT experience in Argentina and Uruguay as well as their local sales presence and the ability to provide high quality support," says Steven Lund, Director of Business Development for Paragon Application Systems. "We are delighted to partner with Dynamic S.A. for the distribution and support of our products. Together we will ensure that our mutual customers in the region are productive and completely satisfied with Paragon's suite of end-to-end testing solutions."

### **About Paragon Application Systems**

Paragon Application Systems is the leading global provider of ATM, EFT and POS simulation, configuration and testing software tools to the financial industry. More than 350 financial institutions in over 70 countries use Paragon tools to improve quality, and reduce time-to-market. Paragon's broad customer base includes major interchanges, such as NYCE, STAR, and SHAZAM; processors, such as Genpass Technologies, Metavante and Fiserv; leading software providers, such as ACI Worldwide, CSF International, S1 and XP Systems; banks such as BB&T Corporation, Bank of Hawaii, and Citibank; and more than 75 credit unions.
