

What is the best option for your ATM testing needs?

- ▶ When to use ATMulator+
 - **Test the load/configuration file for the ATM**
 - Simulate the transaction flow from the ATM User's perspective
 - View or change the screen or state content
 - Validate what screen is displayed in an error situation or what the flow looks like for a 'not on us' customer

- ▶ When to use FASTest for ATMs
 - **Test the ATM driving application**
 - Perform regression testing
 - Run all transactions with all of your test cards rapidly
 - Import a log of ATM transactions from your host or ATMulator to use in FASTest
